BENJAMIN WOODS

Multidisciplinary Designer

615-483-3493 | benwoods.design@gmail.com | Nashville, TN | Portfolio: benwoods.art

PROFESSIONAL SUMMARY

Designer with 8+ years of experience across brand identity, print production, web, social, motion, and illustration, currently directing creative for 10+ product lines and licensed IP partnerships across sports, entertainment, and pop culture. Equally comfortable running a brand system, building production pipelines, and shipping press-ready files at volume, through both traditional and AI-assisted workflows. Continually testing and integrating new tools across the design and AI space, and training teams on the workflows that come out of it.

WORK EXPERIENCE

Graphic Designer / AI Production Specialist, Wild Card

2025 - Present

- Led creative direction and production for licensed IP spanning athletes, entertainers, and major media franchises, plus original character art and insert sets across sports, entertainment, and pop culture.
- Created the product design system, prompt library, and visual standards the team uses to keep AI-generated and traditional assets on-brand.
- Developed an AI-assisted production pipeline (Claude, Leonardo, Invoke, Excel-to-InDesign data merge) shipping trading cards in large monthly volumes across 10+ product lines and IP partnerships, cutting production time ~50%.
- Owned end-to-end print production for cards, packaging, foil wraps, and marketing collateral, including CMYK color management and press-ready file prep.
- Built scalable InDesign master files with disciplined layer hierarchy, letting repeat runs be revised and reissued without rebuilding artwork.
- Trained 6 team members on AI tooling, prompt engineering, and new production systems, scaling the pipeline beyond a single operator.

Freelance Graphic Designer, Independent

2018 - Present

- Directed brand identity and branding across food, entertainment, music, lifestyle, and Web3 clients, delivering logo systems, type and color standards, and full brand kits teams could run without ongoing support.
- Designed album artwork and vinyl packaging, show posters, and tour visuals for recording artists, handling concept, layout, and press-ready files across varied print specs and formats.
- Produced merch programs spanning apparel, accessories, and drop collateral, including a program for a podcast with 2.5M+ followers.
- Built websites, landing pages, product interfaces, and Amazon storefronts, taking UI/UX from wireframes and user flows through responsive layout.
- Shaped social content strategy and campaign design across client accounts, translating brand systems into editorial, organic, and paid placements.
- Delivered character art, motion graphics, and collection assets for independent Web3 projects, working with small founding teams from concept through launch.

Lead Designer, Augminted Labs (Contract)

2023 - 2025

- Set creative direction and brand systems across 7+ Web3 and lifestyle brands, shipping 5+ launches spanning worldbuilding, visual identity, and production-ready asset delivery.
- Engineered generative collection systems covering trait libraries, layer hierarchy, and rarity distribution, producing large-scale character sets that held visual coherence across every combination.

- Designed UI/UX for dashboards, protocol interfaces, mint flows, and token-gated holder experiences, plus the Figma design systems and component libraries they ran on.
- Ran content strategy and launch campaigns from teaser through reveal, and sourced cross-project partnership drops with founders and community leads.

Data Acquisition Lead, Kevala Analytics

2018 - 2025 | Data Entry Operator (2018-2021), Data Acquisition Specialist (2021-2022), Data Acquisition Lead (2022-2025)

- Mapped electrical grid infrastructure using proprietary internal software, producing core datasets for the company's energy analytics platform.
- Assessed potential EV charging sites by identifying the feeder and substation serving specific locations in rural and urban markets nationwide.
- Processed and maintained QGIS datasets for new state rollouts, translating geospatial and parcel-mapped source data into the company's platform, and led specialized mapping projects spanning photovoltaic system labeling, phase tracing, and substation research.
- Coached and reviewed contract workers after promotion to Lead, running one-on-one sessions and authoring learning materials that lifted quality assurance on the team's data output.
- Partnered with engineering on platform functionality and UX, testing builds and proposing interface improvements that shipped into the product.
- Documented processes in Confluence and managed cross-team workflows in JIRA across data, engineering, and operations for a fully remote team scaling from 20 to 100+.

SKILLS

- **Design & Production:** Brand identity, branding, art direction, visual systems, print production and print design (CMYK, cards, packaging), illustration and character art, typography, layout, motion graphics, email design, web design, social design.
- **AI & Workflow:** Prompt engineering, prompt library architecture, SKILL.md authoring for agentic workflows, AI-assisted concept-to-print, automated design systems, team training and rollout.
- **Technical & Collaboration:** Design system architecture, UI/UX design and prototyping, generative trait and rarity systems, Excel-to-InDesign data merge, remote collaboration.
- **Software:** Adobe Creative Suite (Photoshop, Illustrator, InDesign, Acrobat, After Effects, Premiere Pro), Figma, Framer, CapCut, QGIS, JIRA, Confluence. AI tools: Claude, Claude Cowork, Midjourney, Higgsfield, Leonardo, Invoke, ComfyUI, Runway, Firefly.

EDUCATION

B.S. Music Business, Minor in Entrepreneurship
Middle Tennessee State University | 2014 - 2018
